Dear Resident

West Midlands Interchange – Upcoming traffic management on A5 Watling Street

I am writing to provide you with an update on our upcoming programme of highway works related to the construction of the West Midlands Interchange Development.

As part of the ongoing construction of the new access roundabout on the A5 Watling Street, we will shortly be carrying out a series of highway improvements.

To ensure the safety of road users and our workforce, these works will require full overnight closures of A5 Watling Street between A449/A5 Gailey Roundabout and M6 Junction 12. This work will take place from **Monday 10 August** until **Friday 21 August**. Please note that the closure will not be in effect on Tuesday 11 August. **Our working hours will be from 8pm to 6am, Monday to Friday.**

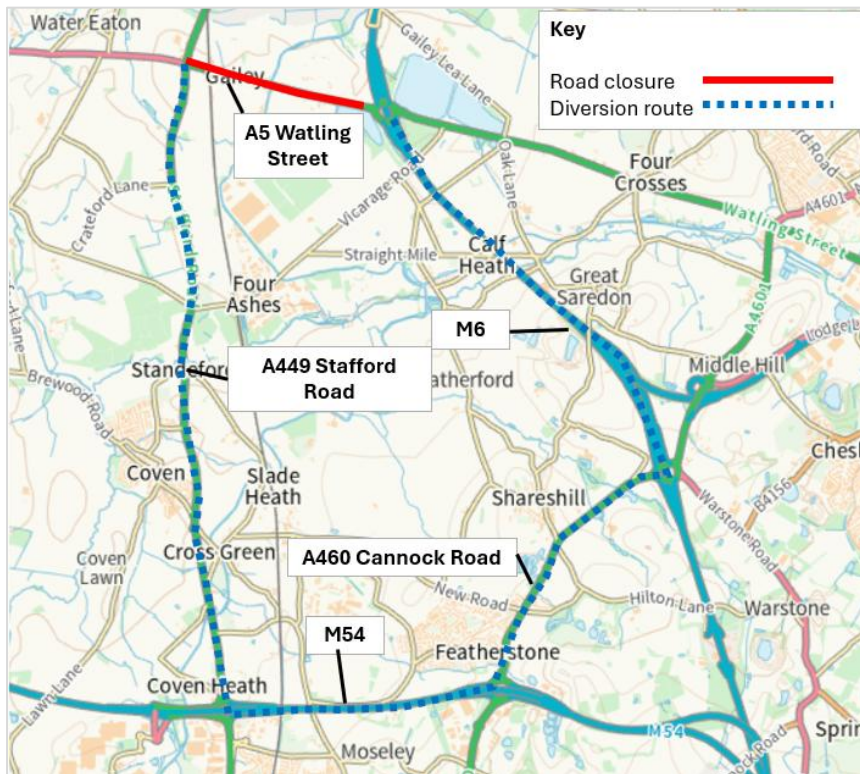

The works to be completed during these closures include:

- Completion of the new shared footpath and cycle path at Gailey Roundabout and outside of Gailey Service Station, including laying the final surfacing.
- Completion of the installation of new street lighting ducting across the A5 carriageway and southern verge, including new signage.

A fully signed diversion route will be in place during these closures which can be seen on the following page. Access to properties will be maintained at all times.

Diversion route

There will be a fully signed diversion route in place during the closures. Road users will be directed along the A449 Stafford Road, M54, A460 Cannock Road, and M6 to rejoin the A5 Watling Street.

Contact us

We hope this information is helpful and we apologise for any disturbance these works may cause. Should you have any questions or concerns please feel free to contact us via email contactus@communityrelations.co.uk or call 0800 377 7345. A cut off section has also been provided below with our contact details.

Yours sincerely

David Wright
